
GAME DESIGN PRINCIPLES

- GD is balancing game systems, game feel and player expectations (psychology).
 - GD is creating, shaping and balancing mechanics, systems and rules of a game.
 - GD may also encompass level design, narrative design, sound & visual design and so on.
 - GD is a balance of balances; small changes can have massive and complex impacts.
 - Everything in the game must have at least one purpose.
 - High-level provides context and managerial systems and structures.
 - Low-level concepts give way to actual gameplay and ways to interact with the game.
-
-

GAME CONCEPT 1

1. Concept Brief
 2. Game Experience
 3. Creative Foundations
 4. Predicted Issues
-

CONCEPT BRIEF

PROJECT TITLE: *Game 1?*

PORTFOLIO PRIORITY:

GAME GENRE(S)	Action/Adventure, platformer
TARGET PLAYER COUNT	1
TARGET AUDIENCE	Fans of 3D platformers, nostalgia
TARGET GAME TIME	Main 4h, extra 2h

ELEVATOR PITCH (one sentence):

Where the narrative of zelda meets the wackyness of Spyro and game mechanics of SM64, in a 3D action packed platformer adventure full of many challenges and puzzles and combat!

GAME EXPERIENCE

ESSENTIAL EXPERIENCE (game flow and mood):

The player spawns in a dream world and must navigate 3D platforming levels, solving quests for NPCs, gathering collectables and progression through the story.

To navigate each level, the player will make use of jumps, wall-jumps and

How do we solve quests, dialogue feel

What do you collect, why

How the game ends

//Upon spawning in a dream world the player is guided by the collectables such as coins, and gems then they meet enemies on their way where they will navigate through the world interact with the village people and help them solve their problems!

KEY MECHANICS (high-level):**KEY MECHANICS 1: ?**

Platforming mechanics; include things like jump, run, wall-jump, double-jump...

Ingredients or parameters:

P: Jump height, speed, range;
I: platforms, moving platforms, crumbling platforms...

KEY MECHANICS 2: ?

Collectables; (score, upgrade?)

Ingredients or parameters:

P:value, hide boolean, sprites
I: Coins, stars, eggs;

KEY MECHANICS 3: ?

Simple combat system, light attack and heavy attack (punch & kick)

Ingredients or parameters:

P: Damage value, stamina (?), Protection, Life/Health
I: Equipment (weapon & accessory), Enemies, Breakable objects, Hit effects

KEY MECHANIC 4: ?

Evolving simple dialogues; lines change after quest triggers

Ingredients or parameters:

P: Dialogue lines, font styles
I: NPCs, dialog UI, quest triggers

CREATIVE FOUNDATIONS

THEME & STYLE OVERVIEW:

THEME	Dreams as Gateways
SETTING	Odd fantasy world
ART STYLE	Vibrant and Surreal
GENERAL MOOD	Wackiness, unexpected events (surprising)

EXPERIENCE PILLARS:

DYNAMIC GAMEPLAY <i>Always in motion</i>	Constabt Motion and Engagement
STRANGE DREAMWORLD <i>Nothing is normal</i>	Embrace the Absurdity
Unpredictable Encounters Pillar 3 subtitle	Surprises are around every corner
PILLAR 4 TITLE Pillar 4 subtitle	Additional details, if any

INSPIRATIONS:

Zelda , SM64 , Spyro the Dragon, Jumping Flash, Glover 64,
--

PREDICTED ISSUES

GENERAL DESCRIPTION OF ISSUES (one sentence):

Ambitious project requiring complex design, solid progression system and a good amount of assets.

TIME COST TO PROTOTYPE	3+ months for a 1-level vertical slice
MAJOR ISSUE 1	Complex level design required to leverage all mechanics
MAJOR ISSUE 2	Strong progression and trigger system
MAJOR ISSUE 3	Resource-Intensive Visual Asset Creation
